Office Action Summary

Receipt is acknowledged of RCE and amendment of 6/24/02 respectively. Thank you for the reiterated claims. Sorry for the handwriting.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

The election and restriction requirements are maintained, as applicant has not requested otherwise. The elected invention was examined with the matrix products. The species, as far as examiner can determine have not been declared to be equivalent; applicant elected AcMNPVPx1 as the pesticide species.

Claims 69, 70, 74-78 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 7.

The attempt to incorporate subject matter into this application by reference to WO and EP documents is improper because office policy does not yet dictate incorporation of foreign patents and applications, so Examiner requests transfer of the critical material to the specification, or argument for WO and EP incorporation with citation in the instant specification of page and line.

Claims 40-43, 72, 82, and 99 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The following inconsistencies/indefiniteness is evident:

Claim 40 is ~~now~~ redundant; and does not further limit 36, which already requires "well-below—", so all claims dependent on 40 are indefinite. Claim 72 is open to

multiple interpretation; we assume the DNA virus must be either an NPV or a GV; if NPV, then one or more of the NPV of (1); if GV, then one or more of (2). Claim 82, 99 do not have proper antecedent for stilbene. We will go with OXFORD Dictionary for DNA, RNA as being general.

*36-39-61, 63-68, 71, 72, 81-93 and 95-100 are*  
Claims rejected under 35 U.S.C. 103(a) as being unpatentable over Miller

5662891 of Bohm et al 4948586 or Fakh Rudden EP 697170 in view of Rheume et al 5560909.

The rejection of record is maintained.

Applicant's arguments filed 6/24/02 have been fully considered but they are not persuasive. Applicant's arguments have been considered and rejections withdrawn in accord. As to the art rejections, applicant focuses on the instant claim language, as not requiring specified pH or amounts, but mandating pH below solubilization point. We see Rheume achieving that whether willfully or not, in the course of the preparation's having free charged groups, inclusive of carboxyl groups, when the polymers used are those instantly used, and the polymers are not completely solubilized; their dispersed. Further, the particular claim to well known ingredients for the purpose for which they are known to be used, and optimization of effects by adding such ingredients and appropriate amounts thereof, are not seen as bases for patentability—in respect for instance, to the optional ingredient combinations.
